MACHINERY FOR CRUSHING, GRING-ING, AND TRITURATING Stone, Minerals, Pyrite, and Ores of every kind (dry wet), Granite, Fli at, Concrete, Potters' Rough Stuff, Cement, Chemicals, &c., Also for Washing and Separating Metals from

from Quartz. This apparatus, from its many advantageous qual ties, viz., Simplicity, Efficiency, and Cheapnes combined with Superabundant Strength, is render-equal to the roughest work likewise being comparative light and easy of transit. The machine stands alone an UNRIVA LED IN THE WORLD. If the material is no required to be reduced finer than rough sand, or fine gravel, it may be worked or pur-chased without the Trituntor, the same only being used in the preduction of fine powder. Likewise, the washing or amalgamating dish will only be needed when ores and

or amalgamating dish will only be needed when ores and quartz are in question.

The importance attached to this Machine is, that it is not applicable to one object only.—Its advantages may be summed up thus:—

1st.—The crusher consists of a horizontal ram, mounted loosely on an eccentric by means of which a crushing and grinding movement is attained.

2nd—The material is reduced to its required size by simply setting the fixed face.

3rd—The two acting faces are moveable, and can be replaced in a few minutes at a triffing cost, which does not amount to one hun iredth part the cost and trouble of rollers. frollers, 4th—Where the triturator is required, the materia

ath—Where the triturator is required, the material passes over a vibrating sieve (as seen in the illustration), the fine falling through, and the coarse passing into the disc hopper, where it becomes reduced to powder.

5th—Where washing and amalgamating powers are required, the finely ground quartz is discharged into the dish containing quick-silver, wherein water is constantly poured, the whole being stirred by means of routers, and the mud and tailings pass off into a sluice attached to the lip of the dish, intended to catch what precious metal may have escaped, amalgamation.

It may also be necessary to state the Triturating discs are constructed in such a way as to admit of long wear, and will work to the last without the slightest injury to the quality or fineness of the material. THE MACHINES ARE MADE IN THREE SIZES. No. 1. Crushing 20 tens per day of ten hours, Road meta No. 2. " Producing

No. 2. " 40 Producing 4 tons of Quartz per 10 hours,
No. 3. Crashing 60 tons per day of ten hours Producing 8 tons of Quartz per 10 hours. Extract from "THE ENGINEER," May 12, 1871, page 320 Extract from "THE ENGINER," May 12, 1871, page 320

"The ram-head works against a fixed toothed face, and, if there were nothing more, stones put into the hopper would be simply crushed between the two-much as in Blake's machine. But here the similarity ends. It has been found that what we may best term a chewing action materially facilitates the breakage of the stones, and this chewing action is obtained by mounting the ram-head and its thrust-bar or handle on an eccentric close to the head. The motion attained by the use of this ecentric produces the precise effect required very efficiently. All the arrangements are very simple and mechanical, and the machine appears to have nothing about it to get out of order. We were much pleased with 4t."

Thursday, March 28, 1872. The Waggon Tire Bill. It is said that some men are born great, while others have greatness thrust upon them Mr. Bunster, the junior member for Victoria District, may be said to belong to the latter class. The Hon, Speaker has imposed upon his friend, Mr. Bonster, the distinction of bringing is a bill entitled "The Waggon Tire Bill," the object of which is to compel farmers and others in the Districts of Victoria and Esquimalt to use tires to their waggons of a width not less than three inches when using the public highways with a load exceeding in weight 2,500 pounds. Mr. Bunster is entitled to the credit of being a zealous member of the Hodse, and for doing whatever he finds to do with all his might. There is, however, such a thing as having zeal without knowledge, and in this matter of the Waggon Tire Bill we think he has displayed that characteristic. We are sorry to disagree with our friend Bunster, who generally takes a pretty correct view of matters, but in this instance a sense of duty to our many friends in the districts to which this bill is intended to apply, compels us to enter our protest against what we conceive to be a mischievous and, if passed, oppressive measure. We are perfectly satisfied that Mr. Bunster has permitted himself to be induced to father this bill without giving it that due consideration it should have received before taking it in hand, and we are further satisfied that not a half dozen farmers in both districts put together can be found to endorse the conduct of Mr. Ban ster and Mr. Cogan in seeking to impose so needless and burdensome a measure upon them as this Waggon Tire Bill would be if it should pass the House. Is it a light thing that the farmers and DMINECA GOLD teams ers in those districts who have probably struggled long and laboriously to possess the meelves of waggons for their own use either in hadling wood or bringing to market the produce of their furms, shall be debarred from doing so without going to the additional expense without going to the additional expense Grocers & Provision PRINCE ALFRED with tires three inches wide? Messrs. Duck and Rubinson, both practical men, stated that the proposed alteration in waggon tires would add it least fifty per cent. to the original cost of waggons, and yet to carry out a crotchet which the promoter of this bill seems to have got in his head about cutting up the roads, he would entail a serious if not ruinous burden upon very many of his own constituents, whose interests he is supposed to guard, not to j. oprad. ze. Had such the such a proposition emanated from one of the city members, it would not have been so surprising. The streets of this city are kept in repair by special rates imposed upon the citizens, without any assistance from the general government, and if any people have a right to complain of their streets being cut up by narrow tires and heavy loads it is the ratepayers of Vic-toria. We have not, however, heard any such complaints, although it must be confessed the streets of Victoria come in for a full share of what heavy teaming is done. And if it is necessary thus to protect the roads in Victoria and E-quimalt Districts, why not extend a similar protection over all the roads in the Province? Why confine so good a thing to those two districts? Why did not Mr. Walkem seek to include the Mainland trunk road, and Mr. Holbrook the Burrard Iulet road, in the wise provisions of this bill? True, it costs something to keep there roads in repair; but for every dollar the Island roads cost in that way the Mainland roads cost ten, and if it is economy the Commissioner of Lands and Works is studying, why let the experiment be tried between Yale and Cariboo, where there is a wide field to operate on, and not upon the comparative | GROCERIES, PROVISIONS, CLOTHING, & ly insignificant highways of Victoria and Esquimalt Districts. Besides, we do not be lieve in this exceptional kind of legislation Vancouver Island is already victimized enough in that way. Why should the people of this Island be saddled with a special road tax to keep their roads in repair, and those on the mainland be permitted to escape without paying anything? If such a system is good for the island, let it be applied to the mainland as well; and so with reference to the Waggon Tire Bill. But we think neither the island nor the mainland require any such legislation at present. Canada is an older country than this by something like a century, and yet it has never been found necessary to adopt any legal standard of waggon tires on the public highways, except in cities and large towns of a greater width than those now in use in this Province. If the roads in Victoria and Esquimalt districts are incapable of bearing the wear and tear to which they are subjected by the comparatively small amount of traffic passing over them, it is not because the waggon tires are too narrow, but because they are not made as they should be. We sincerely hope this bill may be thrown out altogether. We have spoken with several farmers on the subject, and they express but one opinion in reference to it, and that is of decided hostility thereto. The motion o' THURSDAY EVE. & GOOD FRIDA the hon, momber for Nanaimo "that every man driving such waggons should wear boots with soles four inches thick, was not a whit more unreasonable or absurd than Mr. Bunster's proposal to compel farmers and teamsters to use wheels with tires three inches wide. In wheels with tires three inches wide. In fact, viewed in a financial light the latter proposition is very much the more abserd of the two. Whether, however, the bill be thrown out or not, the motion of the Provincial Secretary that the Act do not come into force unless two-thirds of the inhabitants of each district shall within the months retiring the flowerner that

two months petition the Governor that

the same may become law, will have the effect of putting an extinguisher upon it, for we are quite certain no such petition will ever be presented; and Mr Bunster may thank the Provincial Secretary for thus helping him out of a difficulty which, if it did not sooner or later cost him his seat, would certainly have added nothing to his popularity in the district he has the honor to represent

A QUESTION.

Hon. Attorney General rose to a question of order. Before the Speaker left the chair, and on the approach of His Excellency to assent to certain bills, the member for Lillooet said, "we better let this matter drop until the other farce is over." That was just before the arrival of the Governor. He would move that the words be taken down.

Mr. Humphreys said the hon. gentleman was wholly out of order; the words should have been taken down at the time—the matter was trivial. He was not in his seat at the time, nor could the hon. gentleman hold that he alluded to the Governor at all.

The Hon. Attorney General replied that if the gentleman said he did not allude to His Excellency then he was satisfied to let the matter drop.

Tuesday next. NANAIMO ELECTION.

Mr. C. Booth asked how it was no report had been made with regard to the Nanaimo election petition?

Mr. Beaven said certain parties had been asked to attend to give evidence-Capt. Spaulding. They, the committee, hadn't the power to summon. He was glad the question had come up, for he hardly knew what to do

n the premises. The Attorney General said he knew no reason why Mr. Spaulding, being an officer in the employ of the Government, should not be compelled to attend.

The Hon. Chief Commissioner explained—

Capt. Spaulding knew nothing of the notification to attend, and had expressed himself to him as willing to give evidence. As the Returning Officer, of course he is compelled to attend

Mr. J. P. Booth would like to know, as one of the committee, if they had the power to summon witnesses.

Hon. Attorney General explained it was

one of the privileges of the House. Hon, Colonial Secretary said a similar question had been raised the other day in the Ontario Legislature, -and it appeared that Provincial Legislatures had not the power to commit for contempt. An Imperial Act would be necessary for the purpose.

had the power; there was an Imperial Act. In the Legislatures of Australia they had such power, and enforced it too. Hon. Mr. Robertson quoted from the B. N. A. Act in support of his assertion.

The Speaker quoted from clause 44 of the Constitution Act of this Province. The member for Nanaimo said the question was, had the House the power to summon witnesses?

Hon. Colonial Secretary remarked, what i Capt Spau'ding refused to attend, having been subpænsed; had the House the power to commit for contempt then?

Mr. Beaven had never received a reply to his note to Capt. Spaulding.

The Speaker said the best course was for the House to wait for the passage of the bill giving the power. Hon. Attorney General said the usual

course in this case, was for the Governor to wait until the close of the session to give his assent to the bills passed. It was suggested that an address be sent to he Governor, asking that his assent be given to the necessary bill, and which had passed

Dr. Ash thought this would be an unusual course; it would be sufficient to call the Governor's attention thereto. Mr. Duck would suggest that under the circumstances, all committees be discharged.

Hon. Co.onial Secretary replied. NOTICES OF MOTION. Dr. Ash gave notice he would move that n the opinion of this House, the Crown lands between Bescon Hill and mouth of Victoria barbor should be reserved and set apart as a

end to Canada for a Superintendent of Pubic Schools. Mr. Jamieson would ask the course the Government intended to pursue with regard to the Lillooet ferry. Mr. Semlin on Tuesday to ask to introduce a

bill altering the course of inheritance and descent of real estate. Hon. Colonial Secretary on Tuesday next rould ask leave to introduce a bill to render valid acknowledgments of married women. Mr. Jamieson would ask, whether or not the Colonial Secretary still denies he had had, before the meeting of this House, a statement of the wants and requirements of the Lillooet District, from the members for

The first match of the season was played yesterday on Beacon Hill, between the married and single. The day was most favorable and the game was a very interesting one, the two sides appearing to be pretty equally matched. During the game the ground was visited by a large number of persons, among whom the Leiut. Governor and several ladies were observed. Below we append the score, from which it will be seen bat the match was decided by the first innings, which was won by the married men with thirteen runs to spare From the state of the game when the stumps were drawn there was was but a small chance of the

The Hawaiian Government having gone back on the sub-sidy promised to Webb's line, and formerly paid to the English line, Webb gave orders to his agents to refuse mails to and from Honolulu, and will eventually run to the Navigator's Islands, avoiding Honolulu altogether. This action is attributed to the increase of anti-American prejudice of Englishmen who control the Government. The British steamer Rosario, sent to Ka-

Patterson, was fired upon by the natives boats. She shelled their town, killing a number of natives.

EDITOR STANDARD :- If you will be so kin

as to give me, and a majority, if not all, of the residents of Pandora street, a chance to make a complaint through your columns, you will greatly oblige. Being a visitor of the House of Assembly last evening, I heard the Provincial Secretary state that it was the intention of the Government to turn the present Royal Hospital into a lunatic asylum, and to form the building at the head of Pandora street into a hospital. I sincerely hope that the Government will ponder seriously the matter before they do such a thing. Just imagine having a hospital in the centre of one of the best streets in the city, where there are so many children. It would be impossible to keep them from going near it, and should there be the amount of sickless in the city that there was a few year ago-so many cases of small-pox-what would be the consequence? it would be impossible for any one of us to tell. But I an sure if any one will give the subject a second he Female Infirmary is no place for a hosp al.
